**IRRIGATION / ASPIRATION (Electric)
K-6005**

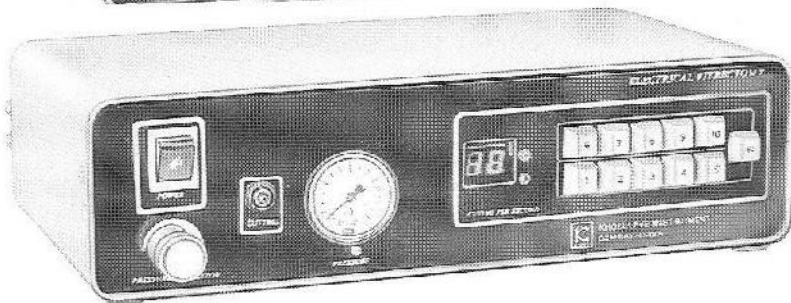

Standard Accessories :

2 pcs I/A Probes With Tubing,
1 Plastic Bottle, 1 Pc Foot Control

**VITRECTOMY (Electric)
K-6006**

For Anterior and Posterior segment
surgeries
Vitrectomy - Lensectomy + Irrigation/
Aspiration system for Extra Capsular
Cataract Extraction

FEATURES

- Light weight, powerful vitreous cutter working with N2O or CO2 to provide powerful cutting action never achieved before.
- Interchangeable, Limited use of disposable blades (cutting edges) to guarantee perfect sharpness.
- Easy to read LED display for cutter speed-variable from single cut to 600 cuts per minute Electronically controlled.
- Guillotine cutting movement. Cutting port remains in open position when off - minimises tissue trauma.
- Vacuum can be preset anywhere from 0-500 mmHg available in **LINER OR FIXED** mode to match your individual needs.
- LED indicator for preset and actual vacuum.
- Single or multiport systems for uni or bimanual techniques.
- Independent and concurrent cutting, suction reflux possible.
- Versatile modular design customized to your needs.
- Light source, fluid-gas exchange, bipolar cautery can be added separately.
- You can safely and positively use all imported pneumatically driven handpieces presently available made by other manufacturers.
- Unique positive shut off valves for instant venting to atmosphere.
- Power supply : AC 220-240 Volts or 110V on Request.

Standard Accessories : 2 pcs connectors from cylinder to Unit 1 regulator for, 1 packet of washers, 2 power cards, 1 Foot Contract.

Optional Accessories : Vitreous cutters, Posterior Segment Surgery Set, Air Injector, Cold light Source with Endo Illuminator, Bipolar Co-agulator (K-6016), Endo Cryo Unit with intravitreal end freezing Probe (K-6011).

VITRECTOMY SUPER (Gas Operated) K-6007

VITRECTOMY SUPER

For Anterior and Posterior segment surgeries
 Vitrectomy - Lensectomy + Irrigation / Aspiration system for Extra Capsular Cataract Extraction

SPECIAL FEATURES

Non-electric, Portable, Foot controlled

No Compressor. No Vacuum Pump. No Battery

Unit works with cylinder of carbon-dioxide or Nitrous oxide or Central supply CO₂ or N₂O or mini air compressor to provide powerful cutting action

Single or multiport systems for Uni or Bimanual techniques

Provides variable cutting speed

Vacuum can be preset anywhere from 0-400 mm Hg available in linear or fixed mode to match your individual needs

Surgeon can have a selection of cutting and suction or cutting or suction alone

Lightweight autoclavable handpieces with single use disposable cutting edges unique system for the first time to guarantee perfect sharpness

Guillotine cutting movement. Cutting port remains in open position when off- minimises tissue trauma

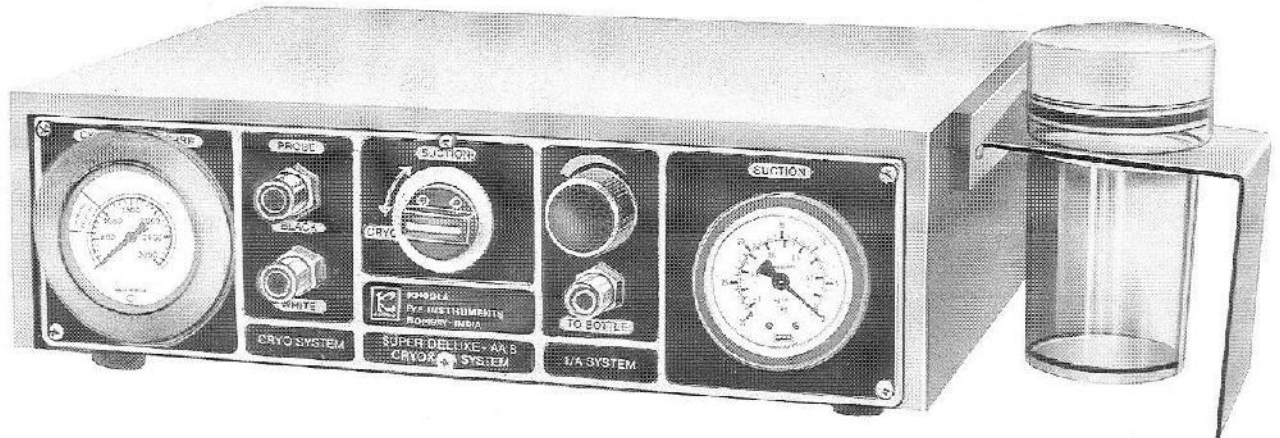

You can safely and positively use all pneumatically driven handpieces presently available made by other manufacturers.

Unique positive shut off valves for instant venting to atmosphere totally eliminates reflux mechanism

Standard Accessories : 2 pcs connectors from Cylinder to Unit, 1 regulator,
 1 packet of washers, 1 foot control.

Optional Accessories : Vitreous cutters, Posterior Segment Surgery Set, Air Injector Cold Light source with Endo Illuminator, Bipolar Co-agulator (K-6016), Endo Cryo Unit with intravitreal end freezing probe (K-6011)

**SUPER DELUXE (Gas Operated)
Cryo & I/A System
K-6008**

SPECIAL FEATURES

Completely Non-electric, Portable

Works with carbon-dioxide or nitrous oxide gas

Foot controlled

Quick Freezing

Instant defrosting by reversible flow of gas system - cleans the probes for every cycle automatically

Lightweight probe tips have high conductivity silver

Useful for Cataract, Retinal Detachment, Glaucoma and Intravitreal surgery

Single Footswitch for Cryo or I/A. Surgeon can select either of the two by a simple selector switch

Surgeon can have a selection of Irrigation or Irrigation and Aspiration with the two position footswitch

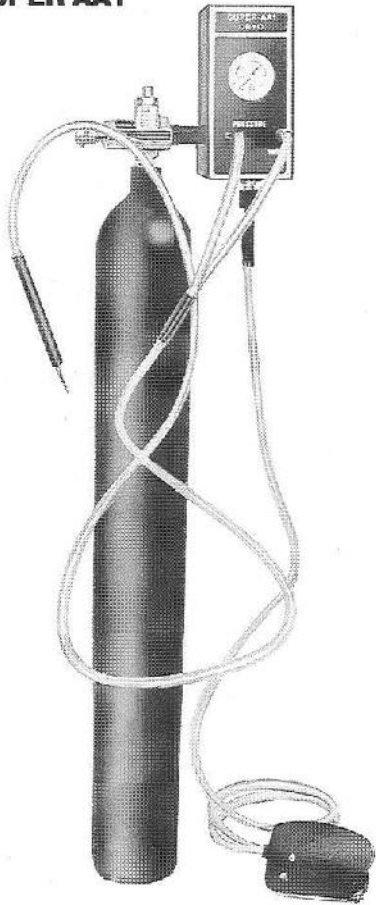

Suction variable from 0 - 300 mm Hg. Surgeon can preset the required vacuum

Lightweight, autoclavable I/A Handpieces available with 0.3 mm and 0.5 mm aspiration ports.

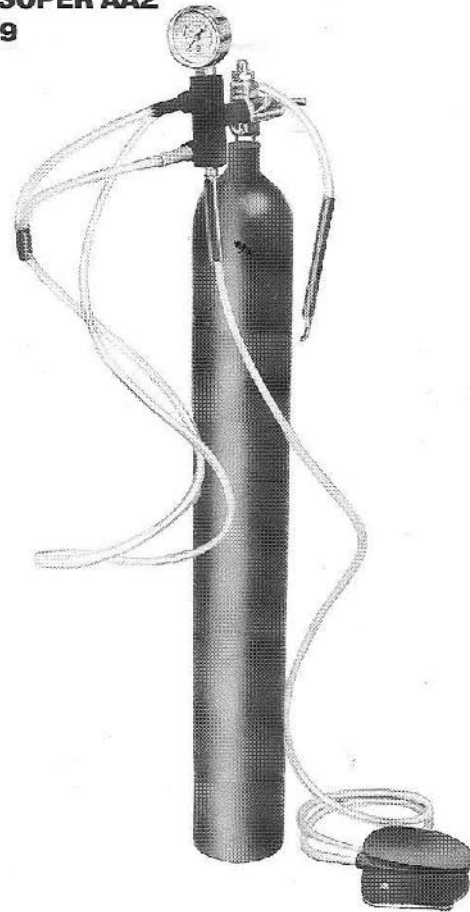

Standard Accessories : 1 Cataract probe, 1 Retinal probe,
2 pcs I/A Probe with Tubing.

Optional Accessories : Different type of Cryo probes (Ref page 135 for details)

CARE OF MICRO SURGICAL INSTRUMENTS

1. MANUAL CLEANING

- i. Immediately rinse the instruments with distilled water after use to remove blood, saline, tissue And other deposits which will stain the instruments.
- ii. Always use a soft tooth brush with mild soap for cleaning.
- iii. Wash the instruments thoroughly with distilled and dry the instruments with a hot air blower or with a soft lint free cloth. (While using a cloth for drying be very careful as the tips can get damaged by contact)

2. ULTRASONIC CLEANING

- i. Ultrasonic cleaning is the best method of clearing micro surgical instruments. Regular Cleaning of the instruments with ultrasonic cleaner with increase the life of instruments.
- ii. Strictly follow the instruction of the manufacturer of your ultrasonic cleaner & use only the Recommended solution for cleaning.
- iii. Do not allow the instruments to touch one another in the ultrasonic cleaner.
- iv. Wash the instruments thoroughly with distilled water and dry the instruments with a hot air blower or with a soft lint free cloth. (While using a cloth for drying be very careful as the tips can get damaged by contact)

3. STERILIZATION

- i. Micro surgical instruments can be sterilized by the following methods
 - a. Autoclaving
 - b. Dry heat
 - c. Gas
 - d. Dry chemical
 - e. Boiling.
- ii. Whichever method of sterilization is used, strictly following the instructions of the manufacturer of the sterilizer
- iii. Clean your instruments thoroughly before sterilizing as sterilizing is not cleaning.
- iv. Instruments not required for surgery should not be sterilized, as sterilizing reduces the life of instruments.
- v. Regularly inspect the internal parts of your sterilizer for rust, as this rust can damage your Instruments while sterilizing.
- vi. Do not allow the instruments to touch one another in the sterilizer.
- vii. Do not allow the instruments to over heat, or be kept in the sterilizer for a long period of time, as this will damage the instruments.

4. INSPECTION

- i. Inspect your microsurgical instruments regularly under a microscope to check the working
- ii. Do not use damaged instruments for surgery.

5. LUBRICATION

- i. Regularly lubricate the joints & locks of the instruments with a high grade lubricant.

6. STORING

- i. Clean the instruments thoroughly before storing.
- ii. Store the instruments in a dry place.
- iii. Always protect the tips of the instruments with soft silicone tubing before storage.
- iv. Do not allow the instruments to move or touch one another when stored.
- v. Use trays with soft silicone mats for storing the instruments.
- vi. All delicate and costly instruments, such as diamond knife, ect. should be stored separately.
